Proposed Project

Background
Aims
Design
Methodology
Describe how the results of data analysis will be used (including via publication)

Data being requested (e.g. variable names)

Youth Vascular Consortium Authorship Agreement Form

As is customary for large multi-center trials, the list of authors on any paper on the Youth Vascular Consortium project will be divided into a "writing group", writing on behalf of the Research Committee and an extended set of authors listed in the appendix of the article. The writing group assumes responsibility for the overall content and integrity of the article and will consist of those who contributed significantly to the project. The appendix will contain all other authors listed per center ordered by the number of contributed subjects. All authors listed in the title line of a publication should meet the criteria of authorship as defined by the International Committee of Medical Journal Editors (ICMJE) (Updated February 2006 on <http://www.icmje.org>) and will thus be required to approve the manuscript prior to submission.

Authorship will be based on substantial scholarly contributions to the research output through a combination of at least two of:

- conception and design of the project
- analysis and interpretation of research data
- drafting significant parts of the work or critically revising it so as to contribute to the interpretation

The right to authorship (in the title line) is not:

- tied to a position or profession
- granted based on contribution of pooled data

With respect to the authorship criteria outlined above, the Scientific leads will be named authors on all publications arising from the consortium, owing to their roles in all aspects namely; 1) oversight of the entire project; 2) conception and design of the project; 3) obtaining funding to support the Consortium and; 4) ongoing management and maintenance of the linked database. The name of Youth Vascular Consortium must be included in the title or subtitle of publications.

We agree that our use of the data from Youth Vascular Consortium project will be in accordance with that outlined in the above Proposed Research Project Form.

Declaration of Authorship
